

We make you easy
to meet the high standards

Oxygen Sensors for Life Supporting Systems
Widest range of compatible sensors for
leading manufactures in the world.

Multiple Applications
Proven performance
All from one hand

Your success will be determined by the use of the right products to meet today's challenges.

At EnviteC we help you succeed with products that meet the needs of your patients and your budget.

Within the scope of our core skill – oxygen analysis, EnviteC offers you Oxygen Sensors for following applications:

**anesthesia
intensive care
hyper baric oxygenation
central gas supply systems**

With EnviteC electrochemical Oxygen Sensors we offer you the largest range of compatible Sensors for almost all leading medical and industry manufacturers:

Airshields, Bio Tek, BMD, Catalyst, MSA, Criticare, Datascope, Datex, Engström, Dräger Medical, NAD, Hamilton, HP, Hudson, Infrasonic, Newport, Maquet, Maxtec, Ohmeda, Teledyne... and more.

We make you easy to meet the high standards

- **multiple applications**
- **proven performance**
- **all from one hand**

Multiple applications

EnviteCs Oxygen Sensors provide the highest level of clinical precision and reliability, and are flexible applicable.

Our electro-chemical medical oxygen sensors meet the high quality standards to be used in anesthesia machines, incubators, ventilators and oxygen monitors.

This widest comprehensive line of various oxygen sensors is dedicated for the most relevant instruments in use today. The sensors are designed for optimum performance under specific medical conditions and according to the high safety standards required in surgery, emergency medicine and neonatology.

All from one hand

EnviteC is one of few manufacturers offering the widest range of compatible Oxygen Sensors with leading monitor manufactures in the world. The advantage is obvious.

You can choose in our wide range of oxygen Sensors taking standard or your special developed individual protected version.

Now you can leave your logistic problems behind. The Oxygen Sensors you need we provide you uncomplicated from one hand.

The affordable price performance will support your budget.

Proven performance

The EnviteC Oxygen Sensors range delivers top product quality sensors that provide you the following key features:

**high precision
reliability
excellent repeatability
signal stability
fast response time
superior durability**

All EnviteC Oxygen Sensors are insensitive to anaesthesia gases in accordance with DIN EN 12 598 (ISO 7767)

On request we offer custom-made protected OEM Sensors. The adaptation of special developed Sensors to your existing product portfolio is possible. We can customize the Sensors by means of changes in design and / or by introduction of special developed protected data memory chips.

The unique constant high quality and long life guarantee of our Oxygen Sensors make this product range high appreciated by our customers world wide.
